

WINDY HILL METAL SALES · SUPPLIER GUIDE

How the Online Checkout Handoff Works

This guide explains what happens the moment a customer places an order on the Windy Hill shop — from payment through to the work order landing in the driver's inbox. No manual steps are required from Windy Hill on a per-order basis; the system handles all routing automatically.

CHECKOUT FLOW — STEP BY STEP

WHAT THE WORK ORDER CONTAINS & HOW IT'S ROUTED

PDF Work Order Includes

- Customer name and contact info
- Product type (Ag Panel / Standing Seam)
- Selected gauge, length, and finish / color
- Quantity and any custom trim line items
- Order total and Stripe payment confirmation
- Order date and unique order reference

Delivery & Routing

- Work orders are emailed to the driver email supplied by The Contracting Company
- Windy Hill does not need to manage or configure email routing
- Automation fires within seconds of a completed Stripe payment
- All orders are also visible in the admin dashboard at admin.structtek.com
- Driver email changes go through Devin at The Contracting Company

CONTACTS & RESPONSIBILITIES

Who	Role	Contact For
Jacob Walker StructTech LLC	Technical build, automation pipeline, admin dashboard	Work order issues, system bugs, catalog and pricing updates in the admin panel
Devin Carter The Contracting Company	Shop hosting, driver email, go-to-market, customer contact	Customer inquiries, sales, promotions; provides and manages driver email address
Windy Hill Metal Sales Supplier	Fulfills orders from received work orders	Must provide before go-live: full product list, pricing sheet, custom trim pricing, all paint colors, and product options/gauges

Before Go-Live: The shop is built but not yet accepting real orders. Windy Hill needs to supply the full product catalog, pricing, and color options to Jacob at StructTech, who will enter everything in the admin panel. The driver email is provided separately by Devin at The Contracting Company.
